

present-- browse-- identify

Find elements belonging to a specific set

Find all fruits

ABTD3V1001

present-- locate-- identify

Find sets containing a specific element

What category(s) do(es) apple belong to ?

ABTD3V1002

present-- explore-- identify

Find elements based on their set memberships

Which element is green and red?

ABTD3V1003

present-- explore-- identify

Find elements with a specific set membership degree

Which element belongs to 3 categories?

ABTD3V1004

present-- explore-- summarize

Filter out elements based on their set membership degrees

Hide element(s) that belong(s) to more than 1 categories

ABTD3V1005

present-- browse-- summarize

Filter out elements based on their set memberships

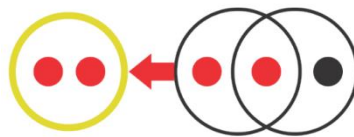

Hide element(s) that is both green and fruit

ABTD3V1006

produce-- --

Create a new set that contains certain element

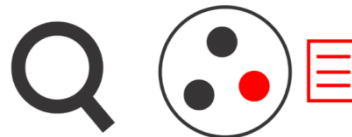

Create a set called delicious, put apple and orange inside

ABTD3V1007

present-- look up-- identify

Find attribute values of a certain element

Find out the price of apple

ABTD3V1008

discover-- browse-- comparison

Find the distribution of an attribute in a certain set or subset

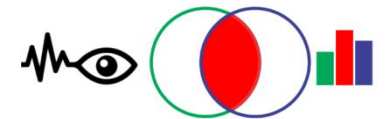

Find out the price distribution in fruit

ABTD3V1009

present-- look up-- comparison

Compare the attribute values of sets or set intersections

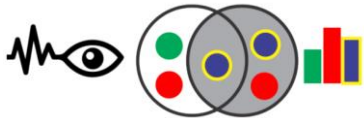

What's the most expensive fruit?

ABTD3V1010

discover-- browse-- comparison

Analyze the set memberships for elements having certain attribute values

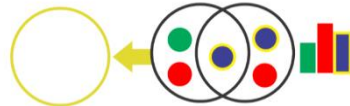

Are there any two items that are more expensive than 4 dollars belong to the same category?

ABTD3V1011

produce-- --

Create a new set out of elements having certain attribute values

Add a category of "expensive" and put all elements that are more expensive than 5 dollars inside of this category.

ABTD3V1012

present-- browse-- comparison

Find the number of sets in the set family

How many categories are there?

ABTD3V1013

discover-- browse/explore-- summary

Analyze exclusion relations

How many categories have exclusion relationship?

ABTD3V1014

discover-- browse/explore-- summary

Analyze intersection relations

How many categories are intersect with other categories?

ABTD3V1015

present-- browse?look up?-- summary

Find intersections between k sets

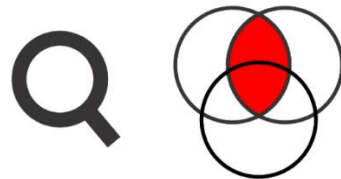

What are the elements that is both fruit and vegetable?

ABTD3V1016

present-- lookup-- summary

Find sets involved in certain intersection

Which category share common element with red?

ABTD3V1017

present-- lookup-- summary

Find set intersections of a specific set

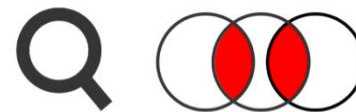

What category(s) does fruit intersect with?

ABTD3V1018

present-- explore-- summary

Find the set with largest pairwise set intersection

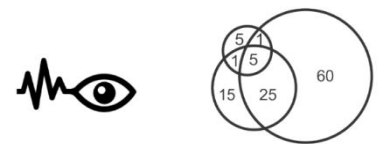

Which category has intersected with most number of categories?

ABTD3V1019

discover-- browse/explore-- summary

Analyze set&set intersection cardinalities

What 's the number of unique elements in each category?

ABTD3V1020

discover-- browse/explore--  
summary

discover-- browse/explore--  
summary

present-- browse-- summary

produce-- --

-- --

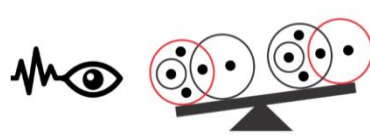

### Analyze and compare set similarities

*What are the similarities between fruit and red?*

ABTD3V1021

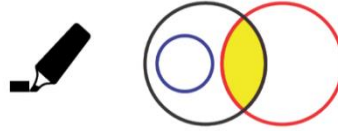

### Analyze and compare set exclusiveness

*What are the difference between fruit and red?*

ABTD3V1022

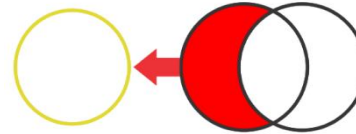

### Highlight specific sets, subsets or set relations

*Highlight elements that are both fruit and vegetable*

ABTD3V1023

### Create a new set using set-theoretical operations

*Create a new set, put all unique elements in each categories into the set (find unique element is another task)*
