Interaction

Abstract/Elaborate

Mark something as interesting .

- Mark items to keep track of them
- Often precedes other operations

e.g.: "Selecting a placemark in Google Maps"

ITD1V1001

Show something different

- Enable users to examine different subset
- Overcome limitations of display size

e.g.: "Panning in Google Earth"

ITD1V1002

Show a different arrangement

- Provide different perspective by changing the spatial arrangement of representation

e.g.: "Sorting and rearranging columns"

ITD1V1003

Show a different representation

- Change visual/retinal variables

e.g.: "Colors/Sizes/Orientation"

ITD1V1004

Show more or less detail

- Adjust level of abstraction

e.g.: "Unfolding sub-categories"

ITD1V1005

Interaction

Connection

Show related items

- High associations and relationships
- Show hidden data items that are relevant to specified items

e.g.: "Linked brushing"

ITD1V1006

Interaction

Filter

Show something conditionally

- Change the set of data items presented based on some condition

e.g.: "Dynamic query"

ITD1V1007
